

FLORIDA PLASTIC SURGERY

LIPOSUCTION Post-Operative Instructions

*****DO NOT REMOVE THE GARMENT ON YOUR FIRST NIGHT- We will remove it at your next- day follow up*****

*****STAND UP SLOWLY and RELAX your shoulders to AVOID DIZZINESS AND FAINTING*****

Swelling and Bruising

- Swelling occurs in everybody and will take up to 2 weeks to reach its maximum. It is common for the lipo area to feel very firm and tight.
- Swelling and bruising in the ground, genitalia, thighs can occur within the feet for leg lipo and the armpit and hands for arm lipo.
- Final results- it usually takes several months for all of the swelling to resolve.

Drainage

- Blood tinged drainage from your incisions is expected and may soak through your garment. Do not be alarmed, it is normal and will subside within a day or two after liposuction.
- We recommend using the pads provided or dark color towels on your bed or couch to prevent staining.

Discomfort/ Pain Medications

- FIRST NIGHT- you will feel an intense wave of soreness and throbbing. This will become less intense in 24 to 48 hours.
- **DO NOT use ice** or cold compresses.
- **Do NOT use heating pads** or hot compresses
- **After Day 4** post-lipo, **Ibuprofen** (Advil, Motrin) may be used to help pain. This will allow you to use less prescription pain medicine.

Itching

- Pain medicine can cause itching. Use non- prescription Benadryl tablets 25 mg as directed.
- If you develop a rash with the itching, please contact us.

Dressings and Garments

- **Compression garment** - We will provide you with two garments.
- The compression garment should be worn **24 hours a day for 4 weeks**.
 - **Do not remove the garments on your first night. We will remove them at your follow-up the next day.**
- **Garments must be WORN FLAT against the skin.** Bunched up and creased garments can cause folds, creases, dents and irregularities. Check your skin in the mirror daily. If you see creases or skin issues, call or send photos to Dr. Hamwi immediately.
- **Foam pads and board-** if placed, foam pads and belly boards are worn 1-2 weeks to help prevent creases. Try to reposition the pad/board slightly every

FLORIDA PLASTIC SURGERY

day to prevent superficial lines from becoming permanent.

- **Posture-** it is important to keep lipo areas smooth and flat. For the abdomen, watch your sitting position. Sit up straight and lean back slightly so you do not bend at the waist.
Arms and legs, watch for creases in the elbow and behind knees with flexion.
For back, watch for creases at the waist and lower back.

Skin and Scar Management

- **Massage-** Massage is not required. But, if desired, lymphatic drainage massage is okay and may begin after your next day appointment.
- **Skin sensitivity-** pricking, itching, tightness firmness are all common from 2 weeks to 3 months. Less commonly, they can last up to 6 months.
- **Numbness-** skin may remain partially numb for 5-6 months as the nerve endings are healing.
- **Showering-** You may shower **AFTER your follow up 1 day after surgery.** No tub soaks, saunas or swimming until all incisions are closed and scabs have fallen off, usually 2-3 weeks after surgery.
- **Driving-** you may start driving once off of narcotics.
- **Exercise-** avoid strenuous exercise for the first 4 weeks. Light activity is ok.
